.75 Fractions and Decimals $\frac{1}{4}$

Decimal

Names parts of a whole using the base ten number system

Numerator
 • The top number in a fraction
 • Shows the number of parts compared to the whole or whole group

Denominator
 • The bottom number in a fraction
 • Shows the total number of parts of the whole

Converting Decimals to Fractions
 Remove the decimal point and rewrite the decimal as a fraction over 100.
 $.25 = \frac{25}{100}$
 Divide the fraction by its Greatest Common Factor.
 $\frac{25}{100} \div \frac{25}{25} = \frac{1}{4}$
 $.25 = \frac{1}{4}$

Improper Fraction
 A fraction that has a larger numerator than denominator

Simplest Form
 When a fraction cannot be reduced further

Fractions
 Express the part of a whole or the number of equal parts of a whole

Mixed Number
 A number that has both a whole number and a fraction

Equivalent Fractions
 Two fractions that represent the same amount or value

Guidance and Counseling

Counselor and Social Worker are available to help students with scheduling/bullying/peer conflicts.

Vacations- Independent study rules. Inform us two weeks prior to leaving. Students can leave for no more than 10 days. All assigned work must be completed and turned in in order to receive credit for the absence.
